**A** TRIBUTE TO OUR ROTARIANS

> Someone once said that it is the Rotarians who make the world go round! Perhaps this isn't entirely the case, but it is a recognized fact that the men whose emblem is the Wheel of Progress contribute much to America . . . and, more specifically, to our own City. Always eager to advance business, good fellowship and the general well-being of our community, these reliable Rotarians comprise a group of citizens of whom we're all mighty proud! With all sincerity we applaud their goals and their achievements. The Rotarians do things ... in a big way!

**A** TRIBUTE TO OUR ROTARIANS

> Someone once said that it is the Rotarians who make the world go round! Perhaps this isn't entirely the case, but it is a recognized fact that the men whose emblem is the Wheel of Progress contribute much to America . . . and, more specifically, to our own City. Always eager to advance business, good fellowship and the general well-being of our community, these reliable Rotarians comprise a group of citizens of whom we're all mighty proud! With all sincerity we applaud their goals and their achievements. The Rotarians do things ... in a big way!

**A** TRIBUTE TO OUR ROTARIANS

> Someone once said that it is the Rotarians who make the world go round! Perhaps this isn't entirely the case, but it is a recognized fact that the men whose emblem is the Wheel of Progress contribute much to America . . . and, more specifically, to our own City. Always eager to advance business, good fellowship and the general well-being of our community, these reliable Rotarians comprise a group of citizens of whom we're all mighty proud! With all sincerity we applaud their goals and their achievements. The Rotarians do things ... in a big way!

STATE OF THE PROPERTY OF THE P

### **Building Main Roads of Concrete Will Save** Citizens Millions in Arkansas

Every citizen has a vital stake in building main roads that meet civil and defense traffic needs. You want safe roads. You want roads of proved

economy because you pay for them with license fees, gas and other motor vehicle taxes.

Most main roads are concrete. Of the most heavily-traveled road sections in the U.S. 92 per cent is concrete. Some of this payement has been resurfaced but it's the rigid concrete slab that still carries the load. Most of America's heavily. traveled turnpikes also are concrete.

Main roads should be built of concrete. It's the safest, most economical pavement.

Concrete's light color reflects up to four times more light than dark payements. You see objects on the road sooner, thus get more time to slow down or stop. If you can't see, you can't be safe!

Concrete has a gritty surface texture that enables you to stop fast in emergencies without skidding, even in wet weather. Concrete is free from hazardous ruts, wash-

board ripples and raveled edges.

Concrete is moderate in first cost yet can be designed accurately for any load-and will keep that load-carrying capacity for life. It costs less to maintain than other pavements, according to official state highway department records, It lasts longer; engineers now know how to build concrete roads that will serve 50 years or more;

Moderate first cost + low maintenance expense +long life=low annual cost, or savings of millions of dollars for taxpayers.

Safety and economy. Two big reasons why all our main roads should be built of concrete,

916 FALLS BUILDING, MEMPHIS 3, TENNESSEE improve and extend the uses at partland coment and concrete through scientific research and engineering field works

The largest sized diamond responsibilities. The largest sized diamond rings are in demand in Texas tary Fund, established in 1947.

The United States Britain and a batch of other countries are members.

Each contributes a share of the money which makes up the fund from which a needy member can ring because it is a prestige.

The largest sized diamond asked to try to visit the Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet interven

STATE OF THE PROPERTY OF THE P

### **Building Main Roads of Concrete Will Save** Citizens Millions in Arkansas

Every citizen has a vital stake in building main roads that meet civil and defense traffic needs. You want safe roads. You want roads of proved

economy because you pay for them with license fees, gas and other motor vehicle taxes.

Most main roads are concrete. Of the most heavily-traveled road sections in the U.S. 92 per cent is concrete. Some of this payement has been resurfaced but it's the rigid concrete slab that still carries the load. Most of America's heavily. traveled turnpikes also are concrete.

Main roads should be built of concrete. It's the safest, most economical pavement.

Concrete's light color reflects up to four times more light than dark payements. You see objects on the road sooner, thus get more time to slow down or stop. If you can't see, you can't be safe!

Concrete has a gritty surface texture that enables you to stop fast in emergencies without skidding, even in wet weather. Concrete is free from hazardous ruts, wash-

board ripples and raveled edges.

Concrete is moderate in first cost yet can be designed accurately for any load-and will keep that load-carrying capacity for life. It costs less to maintain than other pavements, according to official state highway department records, It lasts longer; engineers now know how to build concrete roads that will serve 50 years or more;

Moderate first cost + low maintenance expense +long life=low annual cost, or savings of millions of dollars for taxpayers.

Safety and economy. Two big reasons why all our main roads should be built of concrete,

916 FALLS BUILDING, MEMPHIS 3, TENNESSEE improve and extend the uses at partland coment and concrete through scientific research and engineering field works

The largest sized diamond responsibilities. The largest sized diamond rings are in demand in Texas tary Fund, established in 1947.

The United States Britain and a batch of other countries are members.

Each contributes a share of the money which makes up the fund from which a needy member can ring because it is a prestige.

The largest sized diamond asked to try to visit the Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet interven

STATE OF THE PROPERTY OF THE P

### **Building Main Roads of Concrete Will Save** Citizens Millions in Arkansas

Every citizen has a vital stake in building main roads that meet civil and defense traffic needs. You want safe roads. You want roads of proved

economy because you pay for them with license fees, gas and other motor vehicle taxes.

Most main roads are concrete. Of the most heavily-traveled road sections in the U.S. 92 per cent is concrete. Some of this payement has been resurfaced but it's the rigid concrete slab that still carries the load. Most of America's heavily. traveled turnpikes also are concrete.

Main roads should be built of concrete. It's the safest, most economical pavement.

Concrete's light color reflects up to four times more light than dark payements. You see objects on the road sooner, thus get more time to slow down or stop. If you can't see, you can't be safe!

Concrete has a gritty surface texture that enables you to stop fast in emergencies without skidding, even in wet weather. Concrete is free from hazardous ruts, wash-

board ripples and raveled edges.

Concrete is moderate in first cost yet can be designed accurately for any load-and will keep that load-carrying capacity for life. It costs less to maintain than other pavements, according to official state highway department records, It lasts longer; engineers now know how to build concrete roads that will serve 50 years or more;

Moderate first cost + low maintenance expense +long life=low annual cost, or savings of millions of dollars for taxpayers.

Safety and economy. Two big reasons why all our main roads should be built of concrete,

916 FALLS BUILDING, MEMPHIS 3, TENNESSEE improve and extend the uses at partland coment and concrete through scientific research and engineering field works

The largest sized diamond responsibilities. The largest sized diamond rings are in demand in Texas tary Fund, established in 1947.

The United States Britain and a batch of other countries are members.

Each contributes a share of the money which makes up the fund from which a needy member can ring because it is a prestige.

The largest sized diamond asked to try to visit the Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet interven

STATE OF THE PROPERTY OF THE P

### **Building Main Roads of Concrete Will Save** Citizens Millions in Arkansas

Every citizen has a vital stake in building main roads that meet civil and defense traffic needs. You want safe roads. You want roads of proved

economy because you pay for them with license fees, gas and other motor vehicle taxes.

Most main roads are concrete. Of the most heavily-traveled road sections in the U.S. 92 per cent is concrete. Some of this payement has been resurfaced but it's the rigid concrete slab that still carries the load. Most of America's heavily. traveled turnpikes also are concrete.

Main roads should be built of concrete. It's the safest, most economical pavement.

Concrete's light color reflects up to four times more light than dark payements. You see objects on the road sooner, thus get more time to slow down or stop. If you can't see, you can't be safe!

Concrete has a gritty surface texture that enables you to stop fast in emergencies without skidding, even in wet weather. Concrete is free from hazardous ruts, wash-

board ripples and raveled edges.

Concrete is moderate in first cost yet can be designed accurately for any load-and will keep that load-carrying capacity for life. It costs less to maintain than other pavements, according to official state highway department records, It lasts longer; engineers now know how to build concrete roads that will serve 50 years or more;

Moderate first cost + low maintenance expense +long life=low annual cost, or savings of millions of dollars for taxpayers.

Safety and economy. Two big reasons why all our main roads should be built of concrete,

916 FALLS BUILDING, MEMPHIS 3, TENNESSEE improve and extend the uses at partland coment and concrete through scientific research and engineering field works

The largest sized diamond responsibilities. The largest sized diamond rings are in demand in Texas tary Fund, established in 1947.

The United States Britain and a batch of other countries are members.

Each contributes a share of the money which makes up the fund from which a needy member can ring because it is a prestige.

The largest sized diamond asked to try to visit the Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet interven

STATE OF THE PROPERTY OF THE P

### **Building Main Roads of Concrete Will Save** Citizens Millions in Arkansas

Every citizen has a vital stake in building main roads that meet civil and defense traffic needs. You want safe roads. You want roads of proved

economy because you pay for them with license fees, gas and other motor vehicle taxes.

Most main roads are concrete. Of the most heavily-traveled road sections in the U.S. 92 per cent is concrete. Some of this payement has been resurfaced but it's the rigid concrete slab that still carries the load. Most of America's heavily. traveled turnpikes also are concrete.

Main roads should be built of concrete. It's the safest, most economical pavement.

Concrete's light color reflects up to four times more light than dark payements. You see objects on the road sooner, thus get more time to slow down or stop. If you can't see, you can't be safe!

Concrete has a gritty surface texture that enables you to stop fast in emergencies without skidding, even in wet weather. Concrete is free from hazardous ruts, wash-

board ripples and raveled edges.

Concrete is moderate in first cost yet can be designed accurately for any load-and will keep that load-carrying capacity for life. It costs less to maintain than other pavements, according to official state highway department records, It lasts longer; engineers now know how to build concrete roads that will serve 50 years or more;

Moderate first cost + low maintenance expense +long life=low annual cost, or savings of millions of dollars for taxpayers.

Safety and economy. Two big reasons why all our main roads should be built of concrete,

916 FALLS BUILDING, MEMPHIS 3, TENNESSEE improve and extend the uses at partland coment and concrete through scientific research and engineering field works

The largest sized diamond responsibilities. The largest sized diamond rings are in demand in Texas tary Fund, established in 1947.

The United States Britain and a batch of other countries are members.

Each contributes a share of the money which makes up the fund from which a needy member can ring because it is a prestige.

The largest sized diamond asked to try to visit the Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet intervention in Hungary and reconstitute Russian capital to discuss a halt to Soviet interven

STATE OF THE PROPERTY OF THE P

### **Building Main Roads of Concrete Will Save** Citizens Millions in Arkansas

Every citizen has a vital stake in building main roads that meet civil and defense traffic needs. You want safe roads. You want roads of proved

economy because you pay for them with license fees, gas and other motor vehicle taxes.

Most main roads are concrete. Of the most heavily-traveled road sections in the U.S. 92 per cent is concrete. Some of this payement has been resurfaced but it's the rigid concrete slab that still carries the load. Most of America's heavily. traveled turnpikes also are concrete.

Main roads should be built of concrete. It's the safest, most economical pavement.

Concrete's light color reflects up to four times more light than dark payements. You see objects on the road sooner, thus get more time to slow down or stop. If you can't see, you can't be safe!

Concrete has a gritty surface texture that enables you to stop fast in emergencies without skidding, even in wet weather. Concrete is free from hazardous ruts, wash-

board ripples and raveled edges.

Concrete is moderate in first cost yet can be designed accurately for any load-and will keep that load-carrying capacity for life. It costs less to maintain than other pavements, according to official state highway department records, It lasts longer; engineers now know how to build concrete roads that will serve 50 years or more;

Moderate first cost + low maintenance expense +long life=low annual cost, or savings of millions of dollars for taxpayers.

Safety and economy. Two big reasons why all our main roads should be built of concrete,

916 FALLS BUILDING, MEMPHIS 3, TENNESSEE improve and extend the uses at partland coment and concrete through scientific research and engineering field works

Step into the worderful world of AUTODYNAMICS

### It tames a tornado of torque!

It breaks through the vibration barrier It is swept-wing mastery of motion

Ahead of you, the hushed purr of a muted engine throbs with power, And at your fingertips, the push-button magic of new TorqueFlite automatic transmission stands ready to convert this power to surging take-off. A touch of the "Drive" button triggers the newest, slickest, most responsive "get up and go" on the road. You sweep to cruising speed through an extra speed range that gives silk-smooth breakaway acceleration. Here is push-button driving that packs a thrilling new "1-2 punch" for complete and effortless command of

every driving situation. You break away from the pack when the light says "go." Romp through stop-and-go 5 o'clock rushes, Breeze past "highway crawlers," Push-button driving is just one of the exciting experiences that await you in the Swept-Wing Dodge, There's a mighty new aircraft-type 310 hp. Super D-500 V-8 Engine. New Total-Contact Brakes that match stopping power with horsepower, New Torsion-Aire Ride that cushions you in a "Realm of Silence." All this is yours in a low-slung, swept-wing beauty
